

Community Energy and Resiliency Planning

News Release Date
03-28-2024

TOWN HALL

DEPOE BAY COMMUNITY HALL

Join the Green Energy Resiliency Task Force and your fellow community members to share your thoughts, ideas, and suggestions on green energy resources for Depoe Bay.

The Task Force is considering two available grants for communities like Depoe Bay to develop resilience in the face of electrical power outages like the community experienced in January.

THURSDAY, APRIL 4

Feedback is needed from the entire Depoe Bay Community - citizens and businesses - to help the task force discover the needs and ideas for energy resilience in Depoe Bay.

Information and suggestions on the use of wind, solar, wave, and other energy sources will be shared and discussed.

Come and share your ideas on how Depoe Bay can become two weeks ready with green energy resources.

Door prizes and refreshments will be provided.

1:30 PM

MORE INFORMATION

Joe Cannon - menorca@comcast.net
Kathy Short - mayor@cityofdepobay.org

The City of Depoe Bay, along with a Resiliency Task Force from members of Little Whale Cove, are in the beginning stages of the planning for projects and ideas for renewable energy uses within the City of Depoe Bay to make the community energy resilient in the face of power outages as Depoe Bay experienced this past January.

Please check back for more information as it becomes available.
